

SAMIP POKHAREL

Offensive Security Specialist · Red Team Operator · OSCP · OSEP

Kathmandu, Nepal · +977 9842033679 · sameepx2@gmail.com · linkedin.com/in/samip-pokharel

PROFESSIONAL SUMMARY

Offensive security specialist (OSCP, OSEP) with 7+ years across penetration testing, red team operations, malware development, and exploit research. Hands-on experience scoping and executing full-spectrum engagements — web, network, Active Directory, and adversary emulation — backed by custom tooling in C/C++, C#/.NET, Python, and PowerShell. Combines deep technical capability with executive-grade reporting and client-facing communication, delivering assessments across banking, fintech, healthcare, and corporate environments.

EXPERIENCE

Offensive Security Consultant | *StickmanCyber · Australia (Remote)* Jul 2024 – Present

- **Lead full-scope web and network penetration tests** from scoping and threat modeling through exploitation, post-exploitation, and remediation guidance for enterprise clients.
- **Architect and deploy red team infrastructure** including C2 servers, redirectors, and phishing pipelines for adversary emulation engagements that mirror real APT operations.
- **Engineer custom loaders and payloads in C/C++** that evade modern EDR and Microsoft Defender, leveraging direct and indirect syscalls (SysWhispers), ETW patching, PPID spoofing, and process injection.
- **Execute end-to-end red team operations** covering initial access, lateral movement, privilege escalation, and persistence — emulating threat actor TTPs to validate detection and response capabilities.
- **Author technical and executive deliverables** and lead client debriefs, translating complex attack chains and risk impact for both engineering teams and C-suite stakeholders.

Security Analyst II | *Cotiviti · Kathmandu (Remote)* Aug 2021 – Jul 2024

- **Performed VAPT and Active Directory security assessments** across enterprise environments, identifying critical misconfigurations, kerberoasting paths, and exploitable trust relationships.
- **Conducted secure code review** and triaged Veracode SAST findings, validating exploitability and prioritizing remediation work for development teams.
- **Drove purple team exercises** against SOC detections and the enterprise security stack — CrowdStrike, Splunk SIEM, Imperva WAF, ZScaler, Proofpoint, DarkTrace, and Digital Guardian DLP — producing actionable detection-tuning guidance.
- **Partnered with the blue team** to strengthen SOC playbooks, detection coverage, and incident response workflows.

Penetration Tester | *Eminence Ways · Kathmandu* Dec 2018 – Jul 2021

- **Delivered VAPT engagements** for clients in banking, fintech, government, and corporate sectors, covering both web applications and network infrastructure.

- **Led the Research & Development team**, driving internal tooling development, offensive-technique research, and capability uplift across the firm.
- **Performed incident response and malware analysis** investigations for client environments under tight time constraints.
- **Mentored junior testers and trainees** and delivered technical security training programs to government and corporate staff.

TECHNICAL SKILLS

Languages & Scripting: C, C++, Python, Bash, PowerShell

Offensive Security: Web / Network / Active Directory penetration testing, red team operations, adversary emulation, purple teaming, social engineering

Malware & Exploit Dev: Native Windows API, direct/indirect syscalls (SysWhispers), process injection, ETW patching, PPID spoofing, BYOVD EDR killers, x86/x64 reverse engineering, Windows/Linux exploit development (ASLR, DEP/NX, stack cookies, RELRO bypass)

C2 & Adversary Tooling: Cobalt Strike, Mythic, Sliver, Havoc, Metasploit, Evilginx, Gophish

Post-Exploitation: BloodHound / SharpHound, Mimikatz, Rubeus, Impacket, NetExec / CrackMapExec, Evil-WinRM, Kerbrute, Responder, mitm6

VAPT Tooling: Burp Suite Pro, Nmap, Nessus, Acunetix, OpenVAS, Nikto, Sublist3r, Shodan

Security Operations: Splunk SIEM, CrowdStrike EDR, Imperva WAF, ZScaler, Proofpoint, DarkTrace, Digital Guardian DLP, Veracode

CERTIFICATIONS

- **OSEP** — Offensive Security Experienced Penetration Tester · OffSec · May 2026
- **OSCP** — OffSec Certified Professional · OffSec · Mar 2024 · ID: 100121114
- **eWPTXv2** — Web Application Penetration Tester Extreme · INE Security · Nov 2022 · ID: 7755815
- **eCXD** — Certified Exploit Developer · INE Security · Jul 2022 · ID: 1444671
- **CAP** — Certified AppSec Practitioner · The SecOps Group · Jan 2023 · ID: 6910103
- **CSA** — Certified SOC Analyst · EC-Council · Apr 2021 · ID: ECC1973260845
- **ISO/IEC 27001** — Information Security Associate · SkillFront · May 2021 · ID: 02781930917511

EDUCATION

B.E., Computer Science · Siddaganga Institute of Technology, Tumkur · CGPA 7.1 2014 – 2018

RECOGNITION & COMMUNITY

- **Capture-the-Flag:** Runner-Up — ThreatCon CTF (2023, 2022, 2019); Winner — NepHack CTF 2020
- **Bug Bounty:** Acknowledged by Facebook, Xiaomi, and Microworld Technologies for responsible disclosure
- **Speaking & Leadership:** Co-Leader & Speaker, Hack The Box Nepal; Speaker at OWASP Kathmandu and Pentester Nepal
- **Community:** Active participant in ThreatCon Nepal, BSides Ahmedabad, NepHack, Bounty Bash, and OWASP Nepal Chapter
